The following technologies and innovations will further help players get the most out of gameplay:

Engine – FIFA 2012 engine provides players with the most immersive and playable football gaming experience ever. The updated engine will provide an enhanced visual presentation of the game, along with a more realistic ball physics. It will also give players the ability to play the game in online or offline modes via local Wi-Fi and/or mobile broadband access.

Gameplay – FIFA 2012 brings the best possible gameplay to fans. It offers new gameplay features that allow players to free up space and time on the pitch to enjoy the game with more focus and control. It will also lead to more creativity, more explosive and faster football and, as a result, more goals. In addition, new and improved off-ball intelligence will mean that players are challenged to think and act in new ways.

New Players – The FIFA 2012 Player Career mode allows players to follow their personal career, embarking on a competitive journey from college through to the European leagues. The game includes a new Player Search function, which can be used to identify the best players available on the current gamesheet and then search for a "Player ID" to bring them into your game. Players can then make their choices and build a team from scratch, focusing on the development of the players and purchasing the correct role-specific attributes.

Post-Match – The new Post-Match brings many new features to the game: online tournaments, referee reports, team news, player news, ability to edit player role definitions and performance indicators, ability to manage player schedules, and more. Many of these innovations were developed under the auspices of FIFA's development arm, EA SPORTS, working with external research and development teams and subject matter experts from the best research universities in the world.

What's New In FIFA 11? FIFA 11 redefines the game experience. Players will now be introduced to an enhanced play experience in this year's edition. It also features a number of new gameplay innovations, such as improved Player Intelligence, the "super tackle", team and opposition A.I., and more.

Enhanced Player Intelligence – Players use information from real-life footballers' technique and behavior to create the most realistic version of football ever created. The tactics of top players are taught to the in-game players using a process similar to learning a language. They will choose the tactics that are most appropriate for them. The result is

EA SPORTS FIFA is the biggest name in football on consoles and the most popular football experience on any platform. FIFA is football as you know and love it, on the pitch and in the world of the sport. It's the best way to play football ever. Where does the name FIFA come from? In the beginning, football was played just like today. Players used to run around each other and kick the ball. Soccer, as it was called, was just a set of rules and a way of keeping score for people who wanted to play for fun. The players were known as "Footballers." It didn't take long before some of them got really good. A few tried to make the sport more popular, calling it soccer. The Footballers became the "Football Association." It decided the rules and organized tournaments. Soccer, soccer... The Football Association began to see football as a way to unite people. They worked together and changed the rules to make the game safer for everyone, including the players. Soon, they changed the name to "Association Football." Then one of the game's greatest players, William McGregor Paxton, came along. He was a true football legend. He played for the Football Association and was its greatest player. The association wanted to give him a title to show what he'd achieved. So they crowned him "FA." Eventually, the Football Association saw football as a great way to unite the world. They brought together people of all different nations to come together and play. They gave the world the World Cup. And the name FIFA was born. The new era of FIFA EA Sports is now celebrating its 25th anniversary. And it's a proud time for us. Our FIFA franchise is the biggest name in football on any platform. We're FIFA. And for the first time, we're really FIFA. When FIFA 17 came out, it was an incredibly fun game. We're developing for the coming generation of consoles and PC, but that's not all. We're building FIFA for the next 25 years. So, what's new in FIFA 22
