i have been getting the same issue. only the button works now. the touchpad does not work at all. the only solution is to go to the bios and change the setting of the touchpad to usb if you have one. but this should be a setting that is already there, and the driver should not need to be updated. i was trying to find a solution to the driver issue with my acer aspire one 757-1164-r3, as the touchpad no longer works. i've tried to follow the solutions that are posted for similar issues, but i'm still getting the same issue. i have a 64 bit version of windows 10, installed on a 32 bit version of the computer.

i've been searching and trying to find a solution for several days now, with no luck. i've tried to follow the solution in the link i posted in my question, as well as other solutions online, but i just can't get it to work. i have the same problem. have a windows 10 1809. i have tried to update all the drivers to the latest. the touchpad is not working properly. i have tried everything. and i also have the same problem on windows 10 1803. could you help me? hi again, i've tried everything to get my touchpad working. i tried to update all the drivers with the latest. it worked for a while but now again

i got the message: "could not load device driver: hpet, hpet driver is corrupt or not installed correctly. i also have the same problem with windows 10 1803. hi, i am having a similar problem with my hp notebook. i was installing the drivers from the hp website and the touchpad was not working. it was working fine before. i tried to update the drivers with the latest version but the same issue is there. could you help me?

Acer Ms 7284 Ver 1.1 Driver 13

another post said to go to add or remove programs and click on the sound, video and game controller icon. i did that and it only had acer driver and driver for windows 2000. not what i need. i'm also having the same problem with my webcam. so i don't know where else to look. i did what you said but still no success. i don't know what to do. i've searched for drivers on the acer website and not only do i not find it, but the only thing i can find is the older driver package that comes with the computer. i do have a device manager that says my device is not working. it says it's impossible to install a driver for this device. but i don't have the driver. i'm at a loss for words. i'm sorry, i just don't know what to do anymore. to remove old drivers, open device manager and scroll down to the section "device manager". right click on the driver that you want to remove and click uninstall. you can also use the control panel to uninstall the driver. i'm also having the same problem. i cannot find my webcam driver anywhere. you were right i've tried the device manager and it has no driver listed. i'm not sure what to do anymore. i'm sorry, but i don't know what else to do. you are one of the few that can read and write to the registry? excellent. i am also one of the few that have found a solution for this problem. all you have to do is go to the start menu and type in the search bar "regedit" (no quotes). this will open up your registry and you can see at the bottom right hand side of the window a section of the registry called "hkey_local_machine\software\microsoft\windows nt\currentversion\drivers\acer\2.2.0". 5ec8ef588b
